# Flexico®

## expert in tailor-made packaging

**Patents:**  
**> 350**

**International  
presence**

With more than 60 years experience in the design and production of flexible packaging, the Flexico® group has developed a unique range of reclosable solutions to meet the needs of each market.

Our sales and R&D teams are at your service and can offer you total packaging solutions ranging from the closure to the packing system for your products.

At home, at work, in hospitals and supermarkets, Flexico®'s products are part of everyone's daily life.

**With the designers of Flexico®'s resealable packaging solutions. Share our creativity and technological expertise to offer to your customers a unique sound and tactile experience.**

## Our activities: serving a multitude of markets

### • Consumer goods:

Food

Beauty  
& Healthcare

Petfood

Fashion  
& Luxury goods

### • Industry:

Chemistry

Packaging

Medical  
& Pharmaceutical

Services

# Our certifications: quality and hygiene certified

## Flexico® an eco-responsible business

- In 2019, 95% of the plastic waste generated during our manufacturing process was regranulated in the aim of being reused by industrial players to provide a second life.
- Our products can be reused due to their reclosable property and are often used again for other applications thereby prolonging their lifecycle.
- Flexico® is part of the SAVE FOOD initiative whose aim is to contribute to food waste reduction at a worldWide scale.

## Our partners:

# What type of profile closure

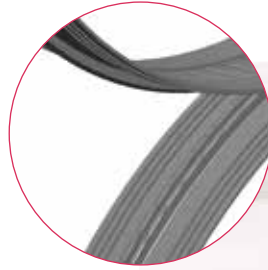

## Zip

### — zipgrip®

**Practical and sustainable**, the Zipgrip® closure has been the Group's flagship for over 40 years. This « press-to-close » profile makes the packaging easy to open and close.

Easy

### — sensogrip®

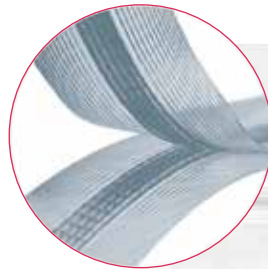

**Airtight and intuitive**, the Sensogrip® closure suits all types of markets.

Hermeticity

Tactile effect

### — zippiz®

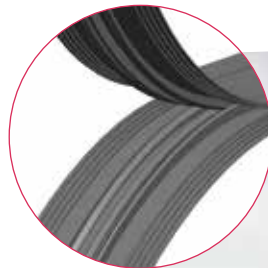

**Safety and protection**, Flexico®'s latest development, Zippiz® is a closure offering a **unique sound and tactile sensation**.

Security

Tactile effect

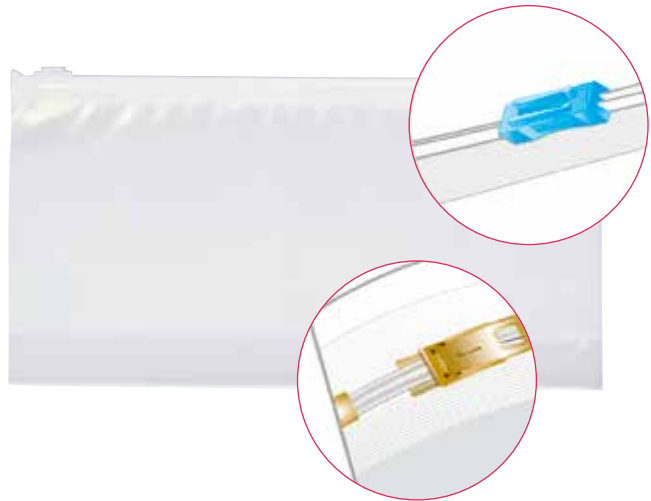

# meets your needs?

## Slider

**Convenient, nomad and appealing.** The slider closure is perfectly suited for **multi-handling**. Slider available in metal or plastic.

Easy

## Adhesive flap

**Permanent or resealable**, the adhesive flap bag makes allows **easy and manual packing**.

Permanent  
or resealable

## Tin-Tie

**Convenient and easy to use**, the **height of the bag** can be adjusted thanks to the integrated **metallic tie**.

Versatile

# Which bag shape to choose?

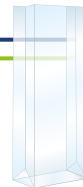

## FLAT BAG:

This is the most common format for plastic bags.

## BOTTOM GUSSET:

The bottom of the bag is folded to form a block bottom which allows the bag to expand and to stand.

## STAND-UP:

The stand-up bag is available in three different formats: Doypack® - K-Seal and Corner Seal. They are able to stand upright on a shelf or other support.

## FLAT BOTTOM:

The bottom of the bag has a square card which, once unfolded, gives the bag a square shape.

## POCKET SIZE BAG:

Bag shaped with a bottom gusset and a large opening which resembles a toiletry bag. This bag can be presented standing up.

## BOX POUCH:

This format includes side gussets and welded flat bottom. It saves space during storage and offers the volume of a box once filled.

# Which finish to choose?

## HANGING OPTIONS

- **Euro slot or DIY shop**  
For double prong

- **Punched hole**  
For single prong

- **Hook**  
For heavy product

- **Wickett bundle**  
Two hanging holes for easy packing. The wickett bundle presents hundreds of bags on a metal prong. For manual or automatic packing.

- **Plastic clip bundle**  
1 or 2 holes for easy packing. A bundle of bags is attached by a plastic clip, for manual or automatic packing.

# The RECYCLABLE Stand-up bag PE/EVOH-PE

The PE/EVOH-PE bag is made from a recyclable laminated film. The presence of a layer of EVOH provides an excellent barrier to oxygen, carbon dioxide and aromas without affecting the bag's recyclability. The layers of polyethylene surrounding the EVOH also provide the bag with a humidity protection. Your products are thereby protected from all external contamination and their properties are preserved!

# The zipgrip<sup>®</sup> bag

## The practical bag for daily life use!

Easy and practical, the Zipgrip<sup>®</sup> bag can be used daily and resists many openings and closures.

The “Clicky” option confirms that the bag is correctly opened or closed due to its tactile and sound effect. The special texture of this zip allows the users fingers to feel it slide when closing.

Our Clicky Zip was designed to improve the day-to-day life of users and consumers.

# The sensogrip<sup>®</sup> bag

## The bag with the intuitive closure!

Resulting from two years of research, the Sensogrip<sup>®</sup> closure offers a sound and tactile effect which guarantees the opening and closing of the bag and ensures excellent hermeticity.

Your product is protected from all external contamination, its containment is optimal (exposure to air is limited, guaranteeing the hygiene of the product).

The Sensogrip<sup>®</sup> closure, patented by Flexico<sup>®</sup>, was developed to be accessible to all, regardless of age or disability:

- Effortless opening & closing, with sound effect, no accessories required
- Intuitive closure thanks to the hermaphroditic multi-hooks: no need to align the hooks to guarantee the bag's closure

### PAPER/PET/CPP Box Pouch Window

Ref.	W x D + SG + BG + L (mm)
■ 1500 ml ITM086536	150 x 255 + (2 x 40) + (2 x 40) + 30

# The **JOKER** Packing system

## The +

**1** A system that combines simplicity, flexibility & performance

**2** A flexible and modular system

**3** Robust machines

**4** A fast and reliable after sales service

The flexible and economical  
bag packing system

The Joker® patented packing solution is comprised of the machine, bags, and a comprehensive range of accessories (work table, conveyor, printer...).

New!

A leasing Joker® machine?

Contact us  
for more information

# The JOKER<sup>®</sup> bags

The Joker<sup>®</sup> bags are linked together in order to ensure **packing of all product types and sizes**.

The way the machine rails are designed means **several bags are opened simultaneously**. Whether filling is manual or automatic, this makes the packing process faster.

**The opening and size of the bag can be adapted to the product being packed.**

Whatever the features and dimensions of the bag, changing from one reference to another is quick and easy.

**It can be carried out in just a few minutes and requires no special tooling..**

**HBF Group**

As an extension and in the application of the policy of HBF Group's sustainable development, we are looking for an industrial local solution enabling us to transform a raw product to a product ready to sell (in his own packaging). We came across a technical difficulty which was to process a small quantity of goods (between 5 to 10 per packaging) in the most automated way possible.

Robust, easy to use and offering real versatility, the Pronova 510 machine quickly conquered us. It allows the number of pieces to be counted during the automatic filling. There are a lot of possibilities of marking various data on the front and back of the bags (for example: with a European hole + closing zip).

This 510 model provides full satisfaction with a rate of use approaching 100%.

Solutions to suit
