

Productsheet

Minigrip® Original

PRODUCT DESCRIPTION

The **Minigrip®** bag is a must-have for reclosable bags. Its unique extrusion process guarantees a high transparency and resistance of the polyethylene.

The bag's content is recognizable at once thanks to the transparency of the bag to highlight your products.

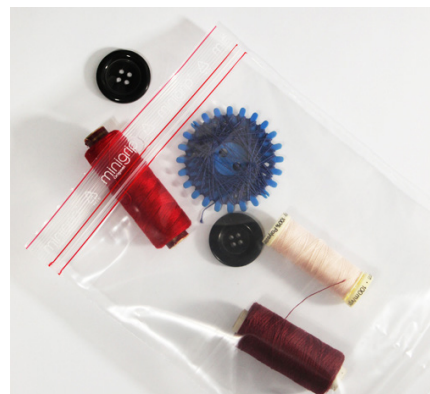

Suitable for food contact, the **Minigrip®** range is perfect to **protect, transport, to pack** or even **regroup** products.

The **original Minigrip®** range is recognizable with **its three red lines**. This range exists in **60** and **100 µm** with more than **55 different sizes**.

The **Minigrip®** range is **customizable** according to your needs: printing, labels...
